

Educational

Kings School, Ely

Peter Dann have been associated with many projects for Kings School, Ely over a period of approximately 25 years.

The majority of the school buildings fall within a conservation area and many buildings are listed.

Projects have included major refurbishment of existing listed buildings as well as major new construction, next to and sympathetic to existing school properties and diocesan sites.

A major development was carried out to produce the Kings Junior School as a separate facility.

We were also involved in the development and maintenance of the school sports and leisure facilities, such as the swimming pool and a new artificial hockey pitch.
