Brampton Park Golf Club, Brampton

PGA standard practice facilities were recently opened by Sam Torrance (Former Ryder Cup Captain) as part of a joint venture between Acushnet (Titleist) and Brampton Park Golf Club.

After planning consent had been obtained we began the process of moving a 900m² settlement lagoon from the centre to the edge of the parkland. Close negotiations with the Environment Agency and the Land Drainage Authority were required. Technical challenges involved careful design to backfill the lagoon with graded types of earth to form a firm well drained surface suitable for a driving range.

A ten bay driving range incorporating extra wide teaching bays and a special club fitting facility for Titleist was designed. Access provisions allow use by wheelchair users. The modern low maintenance facility is clad in a mixture of brickwork walling and green steel cladding to blend into the landscaped parkland.
